

Wetland Link International

An introduction to the network.

Wetland Link International

Set up in 1991, by the Wildfowl and Wetlands Trust (WWT)
UK

Specific focus on CEPA at wetland centres

300 members worldwide – free to join for wetland centres

MoC with Ramsar, also part of Ramsar Resolution X.8 on
CEPA (communication, education, participation and
awareness)

Website, resources, e-mail updates and conferences

Functions through regional networks, at continental scale

What is a wetland centre?

A wetland site (normally with a built structure) where people find out about wetlands

Can be government, private, NGO or community run

Open to visitors – ranging from 10's to 1,000's per year

Urban, suburban, rural, wilderness – as long as it's got a wetland

Themed – birds/animals, habitats, recreation, tourism etc

Key aims of WLI

Goal: To improve wetland CEPA through wetland centres globally

Aims:

Provide resources accessible to wetland centre staff

Offer a coordination role at international, regional and local levels

Work with Ramsar to deliver support to centres actively involved in CEPA

Share best practice between centres

Provide identity and branding

Improve access to funding and resources

What is Ramsar?

International convention on wetlands

Signed in 1971 in Ramsar, Iran

164 member countries

Over 2000 Ramsar sites

Secretariat in Gland, Switzerland

Regular Conference of the Parties (COPs), next
one in Uruguay, 2015

www.ramsar.org

Case study 1: Hong Kong Wetland Park

Opened in 2006

1m visitors in 1st year

Close work with WWT

Complement to Mai Po

Case study 2: Lake Naivasha, Kenya

Lake Naivasha Riparian Association, 3 staff and numerous volunteers
Freshwater lake in semi-arid Rift Valley, Ramsar site
Iconic species – hippo, fish eagle, pelican
Work with local farmers, fishers and landowners to raise awareness
Education and conservation work on site, developing a centre

Case study 3: Creston Valley WMA

7,000ha over 20km valley

Seasonal visitor centre

3,500 visitors per year

6 f/t staff, plus seasonal
workers

Priority themes

Key areas for WLI members to use in their work, with support from WLI global.

- Invasive species
- Migratory birds
- Wise use of Wetlands (WWD)
- Climate Change
- Endangered species

Communication network

- Web site
- E-mail lists by region / core group
- Skype meetings
- Web forum
- Monthly / six monthly newsletter
- Core groups
(Europe/Oceania/Asia/North America)
- Regional meetings (biennial)

The Hong Kong Wetland Park is a 60ha wetland site, with a hi-tech and sustainably designed visitor centre. It runs education and public events throughout the year for both local people and tourists. Interesting species include black-faced spoonbill and fiddler crabs.

Welcome to WLI What WLI can do for you World Map

Wetland Link International

WLI has 344 members in 75 countries on 6 continents. There are regional networks in Asia, Australia and the UK/USA.

WLI works closely with the Ramsar Convention on Wetlands through a memorandum of understanding.
