“Migratory Birds for People”

NEWSLETTER no. 11 (December 2011)

Introduction:

Dear colleagues,
This newsletter contains as usual some news items from the participating sites/centres and the notes from meetings of steering group.
We are very pleased that many of you already have planned to attend the coming **meeting in Bruges, Belgium 25th – 28th of January 2012**!

We wish you all:

- Hyvää Joulua ja Onnellista Uutta Vuotta
- God Jul och gott nytt år
- Веселого Рождества и счастливого нового года
- Linksmų Kalėdų ir Laimingų Naujųjų metų
- Glædelig Jul og Godt Nytår
- Frohe Weihnachten und glückliches neues Jahr
- Merry Christmas and happy New Year
- Vrolijk kerstfeest en Gelukkig Nieuwjaar
- Joyeux Noël et bonne année
- Bon Nadal i feliç any nou
- Feliz Navidad y feliz año nuevo

On behalf of the steering group,

Roelof Heringa (r.heringa@staatsbosbeheer.nl)

"Migratory Birds for People"

NEWSLETTER no. 11 (December 2011)

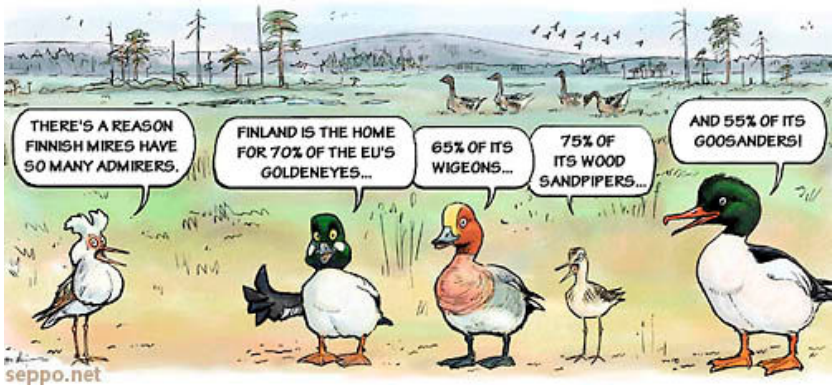
Contents: **Page:**

- **News from the network** **2**
- **Some other network news** **9**
- **News from the steering group** **10**
- **Announcement Migratory Birds of People-meeting, Bruges (draft programme)** **11**

In supplement you find:
- **1. List of participants / partners + contact details steering group** **12**

News from the network:

Finland : Liminganlahti conservation area:



Sweden: Naturum Lake Tåkern

Here at Lake Tåkern we are having an exceptional "winter". Hardly any snow yet (only one day) and lots of geese are staying on! We counted 1500 Bean geese yesterday. Thus, they have stayed already a month longer with us than last year!
Among them were 60 pink footed geese and 50 barnacle geese as well.

We even have two **Cranes** hanging on at Tåkern!
Normally, they have all left by the end of October.

Ellen Hultman
Manager of Naturum Tåkern, Sweden

Lithuania: Nemunas Delta

The steering group has asked **NEMUNAS DELTA REGIONAL PARK** to join the network. Our contact is discussing the possibilities.

(Roelof Heringa)

Contact: Saulius Svazav [Institute of Ecology of Vilnius University]

Russia: CEPA , St. Petersburg,

1. We hope to get funding for the development of mobile wetland wildlife centre next year from the transboundary Estor Latvia-Russia programme (EstLatRus). The international project application was submitted and recommended for fundi the last months of 2011 are reserved for correction of documents etc.

2. Baltic Fund for Nature (BFN) is now widely involved into the preparation of the WLI Russia online conference which v take place on 1st December and hosted by Chris Rostron, WLI global coordinator, and Yulia Danilova, head of educatic programme of BFN.

the Netherlands : Oostvaardersplassen

Results of the counting of large herbivores by helicopter in the Oostvaardersplassen

Aerial view of the Oostvaardersplassen

Staatsbosbeheer has, with the assistance of the Dutch Royal Airforce, carried out a counting of the large herbivores that live in the Oostvaardersplassen. (25 & 26 October). After three flights 3300 Red deer, 360 Heck cattle and 1150 Konik horses were counted by three independent observers. These numbers will give basis for a better view on the population dynamics of the large herbivores in the area. The disturbance of the survey was acceptable.
The numbers are estimated, and for Heck cattle and Konik horses as expected.
The number of Red deer is higher then earlier counting from ground level.

Clip: You may have a look at the clip at Youtube which gives an impression of the counting.

France: Baie de Somme

The Bird House of the Somme estuary as a Wetland center.

The Bird house was created in 1984 on the basis of a collection of mounted birds from more or less 300 spe from all over the world. Instead of a simple exhibition, it was decided to recreate the biotope of each group of specie the difference with a museum, the Bird house tried to change some aspects for the exhibition almost every year. Durin last 25 years, changes dealt with the creation of an outdoor trail with the creation of a marsh, new rooms dealing with s raptors or the history of the Somme estuary. During the same period, outdoors trips were organized on different sub-sit the Ramsar site: Hâble d'Ault, Southern part of the Somme estuary… Recently the Syndicat Mixte Baie de Somme, o of the collections, bought a collection of mounted ducks from all but 3 species of the world.

Towards a new vocation

In 2007, the Bird house became the House of the Somme estuary and of the birds (MBSO), so to develop its content and to answer all the questions of the visitors about the rapid changes of the estuary, in combination with global changes.

The main objective is now to present the main aspects of local changes, sand-in in the estuary, shingle beds erosion, extension of salt marshes, decrease in mudflat surfaces…Considered as one of the centres for the « Baie de Somme as a Grand Site de France », it was necessary to think about what could be the future of the site for the next 25 years.

At the moment, a study is trying to develop some scenarios on the future and in particular on landscape, architecture and exhibition aspects

The main objectives to develop are:

- Give information and aware visitors about natural habitats and biodiversity
- Encourage touristic activities that contribute to nature conservation
- Create a new indoor product on estuaries, wetlands and wildlife
- Create a new wetland around the centre with a discovery footpath
- Develop a footpath around a shingle excavation situated closed to the site.

Benoît Marsal & Patrick Triplet,
Syndicat mixte Baie de Somme, Grand Littoral Picard

France: Camargue Gardoise / Centre de découverte du Scamandre,

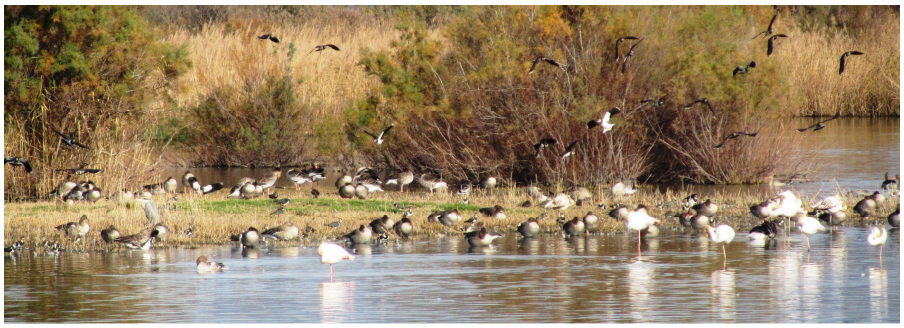
No message received.

Spain: Aiguamolls de l'Emporda

The winter's season and wintering birds in Aiguamolls.

It has been an excellent winter for the moment, with lots of rain (more than 400 mm just in November).

The whole marsh is plenty with ducks (for instance, 2 White fronted geese, a very rare species in Catalonia, and even a Garganey (*Anas querquedula*) in winter, which doesn't happen every year, as it's a summer breeder.



Also some other birds such as flamingos, Glossy ibis (*Plegadis falcinellus*), Bonelli's eagle (*Aquila fasciata*), etc.
Apart from that, during summer season we had grazers in the *Spartina juncea* (similar to small reed grass, called Spani broom) area and after that, we burnt it to increase the habitat for geese, shorebirds, ducks, waders, etc.

The area is now more suitable for birds….

It has been really successful, with a flock of over 300 snipes in a small area, plus teals, mallards, pochards, pintails, shovelers, etc.

Ponç Feliu,
Aiguamolls de l'Emporda, Catalonia

Spain: las Salinas y Arenales de San Pedro del Pinatar

Under the title**: "**El PR de las Salinas y Arenales de San Pedro del Pinatar incluido en Migratory Birds for People" , our partner in Southern Spain announced their involvement in our network.

(Roelof Heringa)

Strengthening Africa through the East Atlantic Flyway initiatives

- **Wings over wetlands**

The Flyway Training Programme under Wings over Wetlands (WOW) project has developed a very comprehensive Flyway Training Kit in both languages (English and French). West Africa was still waiting the French version of the Kit to support the different networks through different trainings. The good news is, the French version of the Kit is now here!!
The beauty is, now the team can go into implementation as the Kit includes tailor-made training materials on topics related to flyway conservation, wetland management and migratory waterbird conservation, targeted to a range of stakeholders in the African-Eurasian region.

In addition, two main projects will be implemented in the region considering the East Atlantic flyways:

- **Strengthening networks for the conservation of migratory birds and their habitats along the west coast of Africa (Birdlife International)**

The project submitted by Birdlife International and funded by MAWA Foundation for the next three and half years (3.5) focuses on the coastal zone of West Africa, which supports some of the highest concentrations of migratory birds in the world. The target area embraces seven countries, following the PRCM (Regional Coastal and Marine Conservation Programme) for West Africa. BirdLife International and Wetlands International will build on their wide experience in Capacity building to strengthen the different networks with the focus on national NGOs. These actions will result in strong partnerships for long-term conservation of migratory birds and will contribute to financial and social sustainability of the project.

The project will also use these strengthened networks to improve the knowledge and conservation status of migratory birds through comprehensive programmes of integrated research, monitoring and conservation action. These will include the development and implementation of a monitoring programme and species action plans

- **International Co-operation For the Protection of Waterbirds Along their Flyways (Common Wadden Sea Secretariat)**

This three year project (2011 -2013) aims at intensifying co-operation for the protection of waterbirds along the African-Eurasian Flyway, with a special focus on capacity-building and improvement of area management and sustainable development. The project is guided by results from an international workshop of March 2011 held in Wilhelmshaven, which identified a need for action in the areas of local capacity-building and sustainable management of protected areas, and proposed activities in the areas of monitoring / research and support / co-ordination of ongoing activities.

An important "bridge" between these two projects and other national initiatives / partners will help the entire region for better achievements of the different project requirements.

Training course on waterbird monitoring for site mangers in Se

Any other network news

- **Kind request for footage**. Wetlands International are in the process of making a film on migratory birds and wetlands, which could also form a resource for each wetland centre as a movie in digital format with images that could be used for a "Migratory Birds for People"- presentation. We hope for your positive response and will of course discuss with you the conditions under which you would be willing to share this material with us.

- The steering group decided to develop a certificate by which the participating visitor centre can show that they are a member of the Migratory Birds for People- network. This certificate can be obtained for free. Just write an email to r.heringa@staatsbosbeheer.nl and we will send you a certificate.

  The first certificate has already been ordered by Vestamager Nature Centre in Denmark! We will bring a number of these certificates to our meeting in Bruges.

  Just to give you an idea:

'Inspiring birds, inspiring people'

.....<NAME OF THE CENTRE>.....

Member of the „Migratory Birds for People" network

Focusing on communication, capacity building and the value of working in partnership to achieve an effective network of visitor centres at Ramsar-sites across the East-Atlantic flyway, publicly promoting the conservation of migratory birds and their habitats.

Signed and dated on behalf of Wetland Link International	Signed and dated on behalf of
Chris Rostron, Head of the network

News from the Steering group ---- period September – November 2011

1. Meetings:

Recent meetings with partners have developed the content and structure of our January meeting in Brussels – this is a great opportunity to see some wetland centres, and to develop our plans for development of the MBP delivery. Although we already have a good set of organizations signed up to attend, we will also contact those partners who are unable to come, to get their ideas and views. The meeting details are within this newsletter, please let us know if you would like to come.

We have also discussed options for funding, and started to contact relevant organizations. There are several EU funds that we could approach, as well as many existing projects that we could work with to seek match-funding, or create joint bids. We will use the January meeting to explore these options further.

Recently we also talked with Abdoulaye Ndiaye of Wetland International West Africa, regarding the involvement of West Africa wetland centres. He will visit centres in the region to identify lead people and to get them to join the network officially. This is likely to happen within the next 2 months. He will also collect some baseline data on their activities. See Abdoulaye's update in the newsletter.

We wish you a great festive break, and look forward to seeing some of you in Belgium to progress MBP further.

Chris Rostron

We think Ellen Hultman has an interesting job nowadays….

Migratory Birds for People: Annual meeting in Bruges, Belgium, January 25 - 28, 2012 (**draft** programme)

Migratory Birds for People: Annual meeting in Bruges, Belgium, January 25-28, 2012

Hosted by the Province of West-Vlaanderen, Natuurpunt vzw and the visitors centre 'Uitkerkse Polder'. Accommodation: Youth-hostel 'De Wullok', (www.dewullok.be), walking distance Uitkerkse Polder.
Contact: Bob van den Driessche, e-mail: bob.vandendriessche@natuurpunt.be

PROGRAMME

25th January - Wednesday
evening: arrive on Wednesday evening: pick up at the railway station in Bruges.
(Brussels airport - Bruges is +/- 1.5 hrs).

26th January - Thursday
Arrival at around 9.30 in Bruges Railway station - we provide transport - or at 10.00 in the visitors centre Uitkerkse Polder, (village is Uitkerkse, about 15 min. from Bruges railway station).

10.00	– CR to introduce meeting content and recap progress so far of MBP.
10.15	– Update session from partners on progress at each site (max 10 minutes each)
11.15 (and coffee)	What does a successful MBP partner look like? Aspirations from each partner, working in pairs, for their own centre or areas of work. Feedback to group.
12.00	– Introduction to the 'interpretation workshop'; setting of tasks over the field visit to look at different interpretation work. Het Zwin to update on their Inter-reg bid and its aims.
12.30	– 13.15 Lunch in the Visitors centre.
13.15	Departure to The Zwin (town is Knokke, near Dutch border), with a stop-over in Damme.
14.00	Field trip and presentation about the new project in The Zwin
17.00	Workshop on strategy areas – either all focus on interpretation, or break into groups for different strategies (preparation for day 2)
18.00	departure from the Zwin to Bruges.
19.00	Dinner and visit Bruges 'Venice of the north' by night, having an inspiring Belgian beer.

27th January - Friday

8.30	– Recap and introduction for those arriving on Friday. Review the work plan. Each strategy group to update on their own area of work and explore the individual actions for each one.
10.00	– coffee
10.20	– Feedback from groups on each strategy area. Agree on actions. Think about opportunities for specific project, partners and funders.
12.00	Lunch at the visitors centre and short field trip to the Uitkerkse Polder (pink-footed goose, short-eared owl, white-tailed eagle). Our guide is dr. Eckhart Kuijken (one of Europe's leading experts on geese and co-signer of the Ramsar-convention in 1971). Continue discussions.
14.30	Plan for activities in 2012, discuss development and funding/resource opportunities. How does MBP fit with local, regional or European projects that could provide match-funding? What funding streams could MBP attract? Can we come up with some key projects as part of MBP that we should prioritise for funding
15.45	- coffee
16.00	Communication. How will we communicate MBP messages and plans to our partners and the wider wetland centre network? What do we need in order to get our messages across.
16.45	– sum up of actions for MBP, and next steps
17.00	Departure for those who wish or have to, or 18.00 Dinner

28th January - Saturday

09.00	Departure to the Blankaart (town: Diksmuide, http://www.natuurpunt.be/nl/de-natuur-in/natuurgebied-de-blankaart_42.aspx), Ramsar area with visitors centre, and the Bourgoyen (town: Ghent, http://www.natuurpunt.be/nl/de-natuur-in/natuurgebied-bourgoyen-_40.aspx), on the way back to Brussels.

29th January - Sunday: optional
